An engineer first, **and a founder second.**

company
Engineer
Established 2025

Platform and data engineer, founder of Engineer ApS

+45 50 10 61 84 · Copenhagen, Denmark

Carefully Crafted With Love by D.

Twenty years of building and running the systems companies depend on — platforms, data pipelines, databases, and the teams around them.

Read her background and the recommendations written for her to judge the fit for your project. Describe the system or decision you need help with; an engineering engagement starts with agreed scope, a price basis and a handover.

How we work

Understand first

We learn the problem before we propose a solution. The brief you arrive with is the start of that conversation, not the end of it.

Build it to last

Durable over quick, clarity over cleverness. The system still has to be workable by the people who inherit it.

Stand behind it

We agree any ongoing operation or support as part of the engagement. Handover makes responsibilities and the next contact route clear.

Read colleagues' recommendations **at the source;** introductions depend on consent.

Read the recommendations

Tell us what you are building.

No form, no funnel, no sales sequence — just one e-mail to a person who will read it.

Start the conversation

This address is about the founder. The company she runs, and the work it has delivered, is at engineer.company.
See everything Engineer ApS does →

Begin with a focused improvement

A workflow, a data flow or a system that needs improvement can be a useful first task. We can agree its scope together.

See what it costs Get in touch →

Plan the first conversation

Tell us the result you need, what is already in place and when you need it. We can use that to discuss the next step.
